PROFESSIONAL SUMMARY

Lead UI/UX and Product Designer with 4+ years of experience shipping user-centered web and mobile products for global clients across 10+ industries. Delivered 300+ digital experiences for 120+ clients, driving measurable gains in usability, engagement, and conversion.

CORE COMPETENCIES

Design & UX: UX Research, User Interviews, Journey Mapping, Information Architecture, User Flows, Wireframing, Interaction Design, Usability Testing, Responsive Design, Accessibility (WCAG)

Design Systems: Component Libraries, Design Tokens, Auto Layout, Variants, Style Guides, Documentation, Developer Handoff

Product & Strategy: Product Discovery, Feature Prioritization, Design QA, Cross-functional Collaboration, Stakeholder Management, Mentorship

Tools: Figma, Adobe XD, Framer, Relume, Lovable, AI-assisted Design (ChatGPT, Claude)

PROFESSIONAL EXPERIENCE

Lead UI/UX Designer - HWAI Technology

Málaga, Spain (Remote) | April 2026 - Present

- Lead end-to-end UI/UX for AI-driven web and mobile platforms serving international clients, owning design direction from discovery to launch.
- Established a centralized design system and reusable component library, standardizing UI across product teams and reducing design-to-development handoff time.
- Defined design standards and review processes, and mentor junior designers to improve output quality and consistency across concurrent projects.
- Partner with product managers and engineers to convert business requirements into validated, intuitive user journeys.
- Introduced AI-assisted design workflows that accelerated research, ideation, and prototyping cycles.

UI/UX Designer - Kimp

Ontario, Canada (Remote) | November 2024 - April 2026

- Designed and shipped 300+ web and mobile experiences for 120+ global clients across 10+ industries, consistently meeting delivery timelines and quality standards.
- Built and maintained scalable design systems using reusable components, Auto Layout, and shared variables, improving design consistency and speeding up production.
- Designed conversion-focused landing pages, onboarding flows, and product interfaces grounded in usability best practices to lift engagement.
- Delivered developer-ready Figma files with documented components, naming conventions, and detailed specs, minimizing implementation ambiguity and rework.
- Collaborated with cross-functional teams and clients to translate requirements into polished, production-ready designs.

UI/UX Designer - RemoteState

Noida, India | September 2022 - November 2024

- Owned end-to-end UI/UX workflows across multiple concurrent client projects, ensuring quality, consistency, and on-time delivery.
- Conducted requirement gathering with national and international clients and translated business objectives into intuitive digital experiences.
- Designed responsive websites, mobile apps, and interfaces with a focus on usability, information hierarchy, and accessibility.

- Produced wireframes, user flows, and interactive prototypes, and initiated reusable design components to support consistent product experiences.
- Worked closely with developers through implementation to preserve design accuracy and ensure seamless delivery.
